Subject: EPA Direction on PRGs

Jim

EPA appreciates the LWG's efforts, including our recent meetings and follow-up discussions, in working with EPA to develop a list of PRGs for use in the FS. EPA has determined that the PRGs have been sufficiently refined (as reflected in the March 24, 2010 PRG list) for the LWG to proceed with the development and screening of alternatives for the FS.

EPA's letter (attached below) provides the LWG with direction on use of the PRGs, including additional evaluations and analysis that we have been discussing, and additional guidance on use of the benthic PRGs. We are looking forward to working with the LWG in the development of cleanup alternatives based on these PRGs.

Please don't hesitate to contact us if you have any questions.

Chip
